

# Ocean Window

## What is Ocean Window?

As its name suggests, it is a window to the marine ecosystem of the south of Tenerife.

## Where do we act and what are our actions?

We work both inside and outside our facilities, in the immediate marine environment.

We create bubbles of experiences (excursions, walks along the mural, talks, exhibitions...).

## Our Values

Link to the sea, family culture, customer proximity, sustainability.

## Vision and final objective

Our aim will be to connect the marine ecosystem with the theme of the hotel, creating experiences for guests with the theme of environmental protection. To become a benchmark hotel for our destination in the family segment..
